

Ames® Super Elasto-Barrier™ Stretch Sample Demonstration Liquid Rubber For Roofs And Roof Decks

- Dual Rubber Coating
- Up To 1000% Elongation
- Outstanding Adhesion
- Standing Water Situations

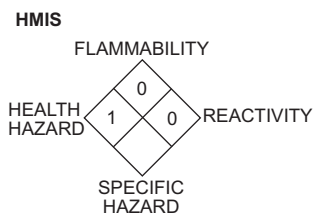

Ames® Super Elasto-Barrier™ is a waterborne liquid dual-rubber coating that is used primarily for roof, wall, and roof deck waterproofing. It stretches up to 1000% to expand and contract with the surface.

Ames® Super Elasto-Barrier is recommended for difficult moisture situations such as ponding water. It is especially effective in saving old tar roof systems. It flows into cracks and crevices as a liquid, and then sets up as a durable rubber to seal leaks wherever they occur.

Super Elasto-Barrier is easy to apply. It can be applied with a commercial airless sprayer.

Ames® Super Elasto-Barrier is environmentally friendly, low odor, non-toxic and VOC-free. It cleans easily with water.

Color: Grey
